   ns of Terms Relating to Subgrade, Soil Aggregate, and Fill
Dynamic Measurement of Water Vapor Transfer Through Sheet
                                                                                                                                          Std. Definitio AASHO
                                                                             Materials (1970)
                                                                                                                                                                    M146
                                                                             Materials (1970)
                                                                                                                                         Test Meth. for TAPPI
                                                                                                                                                                     T523
       est for Reaction Threshold Temperature of Liquid and Solid
                                                                             Materials (1970)
                                                                                                                                      Tent. Meth. of T ASTM
                                                                                                                                                                     D2883T
                                                                                                                                      Rec. Pract. for O ASTM
     perating Xenon Arc Type Apparatus for Light of Nonmetallic
                                                                              Materials (1970)
                                                                                                                                                                     E240
     anically Deposited Coatings of Cadmium and Zinc on Ferrous
                                                                             Materials (1970)
                                                                                                                                  Std. Spec. for Mech ASTM
                                                                                                                                                                     B454
          alt; Uses, History, Definitions, Test and Spec. for Paving
                                                                                                                                 Introduction to Asph AI
                                                                                                                                                                     MS5
                                                                             Materials (1970)
        tements on Precision and Accuracy in Test Meth. of Textile
                                                                             Materials (1970)
                                                                                                                             Tent. Rec. Pract. for Sta ASTM
                                                                                                                                                                     D2906T
                                                                                                             Rec. Pract. for Operating Enclosed C ASTM / for Operating Light and Water Expos ASTM
    arbon Arc Type Apparatus for Light Exposure of Nonmetallic
                                                                             Materials (1970)
                                                                                                                                                                     E188
    ure Apparatus (Xenon Arc Type) for Exposure of Nonmetallic
e Linewidth and Gyromagnetic Ratio of Nonmetallic Magnetic
                                                                             Materials (1970)
                                                                                                                                                                     E239
                                                                             Materials (1970)
                                                                                                              /. of Test for Ferrimagnetic Resonanc ASTM
                                                                                                                                                                     F130
       Manufacture, Transportation, Storage and Use of Explosive nsity of Fibers, Yarn and Intermediates, and Other Textile
                                                                             Materials (1970)
